What is El Salvador's energy sector like?

El Salvador 's energy sector is largely focused on renewables. El Salvador is the largest producer of geothermal energy in Central America. Except for hydroelectric generation, which is almost totally owned and operated by the public company CEL (Comisi#243;n Hidroel#233;ctrica del R#237;o Lempa), the rest of the generation capacity is in private hands.

How much electricity does El Salvador produce a year?

Gross electricity generation in 2006 was 5,195 GWh, of which 40% came from traditional thermal sources, 38% from hydroelectricity, 20% from geothermal sources, and 2% from biomass. In 2006, total electricity sold in El Salvador was 4,794 GWh, which corresponds to 702kWh annual per capita consumption.

Does the Inter-American Development Bank provide technical assistance to El Salvador?

The Inter-American Development Bank (IDB) is currently providing technical assistance to El Salvador in several electricity-related initiatives: World Bank, 2002. CEPAL, 2007. Istmo Centroamericano: Estad#237;sticas del Subsector El#233;ctrico Archived 2011-07-20 at the Wayback Machine
