Could Santo Domingo be under water by 2050?

By 2050, parts of the city could be under water. A water-based power plant could be one very valuable asset. Estrella del Mar III offers a host of benefits to the people of lively Santo Domingo, with a more reliable energy supply, reduced LCoE (levelized cost of electricity), and less noise--residential housing is close to the power plant.

Is Santo Domingo under water?

With 1,600km of sandy coastline, national parks and dramatic mountain ranges, the Dominican Republic is the most popular tourist destination in the Caribbean. Santo Domingo, however, is also among the world's cities that are most at risk of rising sea levels caused by climate change. By 2050, parts of the city could be under water.

Where is Santo Domingo located?

The Dominican Republic capital of Santo Domingo sits at the mouth of the Ozama River. It is one of the Caribbean's oldest cities, and with 3.3 million inhabitants, it's also the most populous. Over the past decade alone, this burgeoning, bustling melting pot has added around 700,000 inhabitants.

Does SeaFloat have a combined cycle power plant in Santo Domingo?

The combined cycle power plant has arrived in Santo Domingo. While floating power stations have been around since the mid-90s, reinventing them with today's efficient, low environmental impact technologies is a first. SeaFloat does just that. And it's proving very popular.
