Does Congo Brazzaville have hydropower?

Hydropower accounted for 25% Congo Brazzaville's total installed electricity capacity in 2021. As of early 2024, the country had three hydropower plants. Congo Brazzaville has significant hydropower potential, estimated at 3.9 GW, but only 5% of this power has been developed.

Why did Eni build two power plants in Congo Brazzaville?

Eni, the leading natural gas producer in Congo Brazzaville, constructed the two natural gas-fired power plants to reduce natural gas flaring and commercialize more of the associated natural gas produced at its oil fields.

Why does Brazzaville have a water intake?

The water intake is built inside a gravity dam to retain water for Brazzaville's electricity demand. Since its construction in the 1950's, there have been many incidents. The most important one occurred in April 2007, when the power plant was flooded up to the control room.

Brazzaville lithium battery energy storage power station It is the first utility-scale battery energy storage project in the state and the Power Authority's first utility-scale battery project. The ...
