-----  
How much does a solar battery cost?

This includes the cost for the unit, which varies from \$6,000 to \$12,000 on average depending on the type and size of the battery. It also includes professional labor costs from \$1,000 to \$2,000 or more for larger or complex systems. All costs listed are before tax credits and incentives, which can lower your solar battery cost by 30% or more.

How much does a solar battery cost in 2025?

The average cost to install a solar battery in 2025 ranges from \$9,000 to \$19,000, with most homeowners spending about \$13,000. The total price depends mainly on the type and capacity of the battery, as well as the complexity of your system.

How much does home battery storage cost?

Installing home battery storage typically costs between \$6,000 and \$18,000, according to live pricing from solar.com's installation network. Why such a wide range? The biggest factor is size, measured by how many kilowatt-hours (kWh) of electricity the battery can store. Battery systems can range from 5 to 40 kWh, depending on your energy needs.

How much does a battery cost on EnergySage?

On EnergySage, Pytes USA Energy offers some of the most affordable batteries at about \$651/kWh. You'll typically pay the most for Enphase batteries, which cost about \$1,510/kWh. \*The average price per kWh of the 10 most quoted batteries on EnergySage in the first half of 2025 (excluding Panasonic, which is closing its solar and storage business).

Solar batteries typically cost \$10,877 after the federal tax credit--which expires for batteries installed after December 31, 2025--for the 13.5 kilowatt-hours (kWh) of storage a ...
