What is the European 5G Observatory?

The European 5G Observatory tracks progress in 5G infrastructure deployment across the EU and other regions worldwide according to base stations deployment, edge nodes and infrastructure sharing agreements. Source: IDATE estimates and regulators' data. Reporting period: at December 2024. Source: IDATE estimates and regulators' data.

Will 5G cross-border corridors Transform Europe?

The deployment of 5G cross-border corridors across Europe holds immense promise for the green and digital transformation of the EU economy and society. These corridors, particularly when integrated with Cooperative, Connected and Automated Mobility (CCAM), serve as crucial enablers for:

How will 5G connectivity impact Europe?

The deployment of 5G connectivity infrastructure along transport paths throughout Europe - 5G corridors - is expected to contribute to the green and digital transformation of the EU economy and society.

Are smart ports a good place to put a private 5G network?

Smart ports are just about the easiest place to put a private 5G network right now - at this point in the development of 5G technology, when outdoor coverage and mobility are its key benefits.

5G Implementations have already started in many cities across Europe. The following Table summarizes the key cities in Europe involved in 5G private trials and pilots (/pre-commercial ...
