What is GreenStation?

Personalize your stream and start following your favorite authors, offices and users. Completed in 2022 in Straume, Norway. Images by Artishot. Greenstation is a company working on developing energy stations with functionality and usability in mind. Greenstation's vision is to create a new...

Does space Norway own fibre optic cables?

Space Norway owns and manages two fibre optic subsea cables that provide stable internet connectivity to Longyearbyen, the main Norwegian settlement in Svalbard. These cables also connect to the research station at Ny-Ålesund. Ny-Ålesund, located at 79° North in Spitsbergen, is the world's northernmost settlement.

What is the GreenStation model?

The Greenstation model believes in providing a green meeting place in either existing trading centers or cooperative partnership development. Together, we can create added value for the local community and EV motorists, making a green difference for the local community. Save this picture!

What is GreenStation's ambition?

Greenstation's ambition is a global network of charging stations and currently inviting retail operators and local property developers to partner to form a forecourt offer that disrupts today's traditional convenience retail models. Save this picture!
