Who owns the National Grid in New Zealand?

The National Grid is the nationwide system of electric power transmission in New Zealand. The grid is owned, operated and maintained by Transpower New Zealand, a state-owned enterprise, although some lines are owned by local distribution companies and leased to Transpower.

What are the major transmission networks in New Zealand?

New Zealand's major transmission network. Generation and load centres are shown as blue and red circles respectively. The major AC transmission corridors are shown as black lines, with the HVDC Inter-Island as a dashed line. The National Grid is the nationwide system of electric power transmission in New Zealand.

How many power lines are there in New Zealand?

A power line following SH1 in South Auckland. The backbone of New Zealand's national grid is the network of 220 kV transmission lines in each of the North and South Islands, which links the major power stations and the country's major cities.

Which type of power supply is most cost-effective?

Where supply lines are nearby, mains or grid-connected power is generally the most cost-effective option. In urban and many rural areas, supply is reliable and easily connected. On this page: mains supply to multiple households. Current grid-connection costs vary considerably depending on energy requirements and distance to connection. For example:
