Should you use solar battery storage in a power outage?

Although solar battery storage will keep important appliances and devices running in an outage, the manufacturers and some installers I spoke with all said they consider that to be a useful but secondary function. Primarily, they view such systems as a way for homeowners to limit their utility bills by practicing something called "peak shaving."

Why should you use portable solar panels?

Charging the batteries with portable solar panels gives you a low-hassle way of maintaining emergency power in your home, even if the grid stays down for an extended period. And because the systems are modular, you can add more batteries if you decide you need to run additional circuits.

Is residential solar power a disaster-preparation choice?

That's why residential solar power combined with battery storage (once an esoteric niche industry) is rapidly becoming a mainstream disaster-preparedness choice, according to more than a dozen installers, manufacturers, and industry experts we interviewed.

Can I add battery backup to my solar system?

The federal Inflation Reduction Act of 2022 also contains incentives that may affect your decision to add battery backup to an existing solar system: Through 2032, you'll be able to claim 30% of the project cost as a tax credit when you file with the IRS.
