-----

A hybrid renewable energy source (HRES) consists of two or more renewable energy sources, such as wind turbines and photovoltaic systems, utilized together to provide increased system ...

It's advice most of us have heard since we were children: don't put all your eggs in one basket. That still holds true for renewable power systems. A wind turbine and solar panel ...

The article also presents a resizing methodology for existing wind plants, showing how to hybridize the plant and increase its nominal capacity without renegotiating transmission ...
