-----  
How is Zambia diversifying its energy sources?

Zambia is diversifying its energy sources with the development of the ZMW 1.3 billion Choma Solar Power Station in Southern Province. The 60 MW photovoltaic solar plant, paired with a 20 MWh battery energy storage system, is set to boost the nation's renewable energy capacity.

Why is Maamba collieries constructing a coal-fired power plant?

To address energy shortages, Maamba Collieries is constructing a ZMW 8 billion coal-fired power plant. The facility, which will generate 300 MW of power, is slated for completion within two years. This project underscores Zambia's efforts to stabilise its energy supply amidst increasing demand and the effects of droughts on hydropower generation.

What is happening in Zambia's mining sector?

The mining sector remains a cornerstone of Zambia's economy. China's JCHX Mining has committed ZMW 6 billion to expand the Lubambe Copper Mine. This includes the construction of a new shaft to access deeper copper reserves, which will significantly increase production and extend the mine's lifespan.

When will Maamba collieries build a power plant?

Construction began in June 2024, with commissioning expected by September 2025. To address energy shortages, Maamba Collieries is constructing a ZMW 8 billion coal-fired power plant. The facility, which will generate 300 MW of power, is slated for completion within two years.

May 12, 2025&nbsp;&#0183;&nbsp;&nbsp;Zambia has kicked off construction works on the first phase of a 100-MW solar project, also featuring battery storage, in Choma District, ...

May 19, 2025&nbsp;&#0183;&nbsp;&nbsp;Of Reference Zambia: Solar energy to fill drought-hit hydropower output void Live water storage levels (the supply available for power generation) on Lake Kariba on the ...
